

REQUIREMENTS

Local Run

Hardware Requirements

- 10GB of free disk memory
- 4GB of RAM
- GPU recommended for faster performance

Software Requirements

- Python 3.8 or later
- Required packages listed in requirements.txt
- Package dependencies managed by pip (or conda)

Note

- The artifact is designed to run on any operating system that meets the above hardware and software requirements.
- Any deviation from standard environments must be reasonably justified.

Cloud Run

- A valid Google account
- Premium access of Google Colab is not required but recommended to avoid timeouts
